# About Us

BABISIL is a collection of silicone-safe baby and toddler products which contain no damaging chemicals. Based in the United Kingdom, BABISIL is dedicated to working with health-care professionals, mums and dads, to create innovative products that support the development of babies, and are great fun to use.

BABISIL prides itself on being a conscientious company. All BABISIL products are produced to the highest standards, protect children from oestrogens and toxins, are rigorously tested, and are packaged to minimise their environmental impact.

Babasil's commitment to "Baby Safety" and "High Quality" grant us great trust from mums all over the world.

**BABISIL**®

**SILBOTTLE**®

The safest baby bottle on the market.  
Be **SILICONE** safe.

**BPA Free**

**FDA**

**Patent Protected**

#### Safe

The Silbottle provides a Bisphenol-A (BPA) FREE, Oestrogen FREE and Phthalate FREE feeding zone. Thus preventing babies from consuming potentially hazardous chemicals and giving parents peace of mind.

#### Breast-like

The Silbottles Collapsible Inner chamber mimics the natural breast lobules, providing a feeding experience which is only "Second to Breast". This makes the transition from breast to bottle and back, more natural for babies.

#### Anti-colic

Valve free; the flexible Silbottle Inner Chamber collapses as baby feeds, eliminating the build-up of air and reducing the potential for colic, helping to create happier babies. The non-valve system also means no air can get into the milk to contaminate it.

#### Easy to clean

Turn the Inner Chamber inside out and wipe clean without the need for a brush. The Inner Chambers are dishwasher and steriliser safe and have a recommended life of 6 months if used every day.

The safest baby bottle on the market.  
Be **SILICONE** safe.

### What is Bisphenol-A (BPA)?

Bisphenol-A is a man-made oestrogen used to make hard, clear plastic known as polycarbonate which is used in many consumer products, including reusable water bottles and baby bottles. When heated, aged or scratched, the oestrogen is released from the plastic and can be harmful to babies, potentially causing altered neurological and sexual behaviour.

- Convenient for outdoor use

# Why Silbottle?

Ingesting air while  
bottle feeding is  
thought to be a possible  
cause of colic

## Reasons:

1

Air is being drawn into the bottle through the valve to maintain inner and outer pressure of the bottle. Air bubbles rise to the surface and are ingested by baby.

2

A blocked bottle valve causes negative pressure in the bottle, resulting in baby swallowing air and no milk.

Main anti-colic bottles on the market:

With valve  
at the bottom

**Disadvantage:**  
Can not avoid  
air getting into  
the milk.

With a straw  
to isolate air

**Disadvantage:**  
Straw is not  
easy to clean.

## Babasil Silbottle

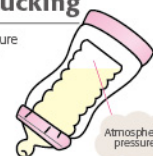

100% safe high quality  
silicone, anti-colic system,  
easy to clean design.

## Difference between Babasil Silbottles and traditional bottles

### BABASIL SILBOTTLE®

#### Before Sucking

Equalised air pressure  
inside and outside  
the bottle

#### Sucking

Silbottle inner chamber  
collapses when  
air pressure  
decreases

#### After Sucking

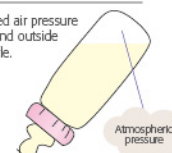

Air does not enter  
the inner  
chamber, effectively  
reducing colic and  
trapped gas

### Traditional Plastic Feeding Bottles

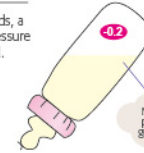

#### Before Sucking

Equalised air pressure  
inside and outside  
the bottle.

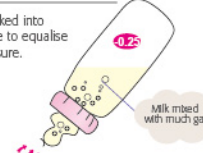

#### Sucking

As baby feeds, a  
negative pressure  
is generated.

#### After Sucking

Air is sucked into  
the bottle to equalise  
the pressure.

VS

## Silicone bottle

One-way venting system

**Reduces Colic, Spit-Up and Reflux**

Mimics natural milk flow and encourages baby to latch on to the teat

12+ months

The high grade silicone feels soft, warm and natural, making your baby feel safe and secure.

**100%**  
food grade  
silicone

**8oz** SKU NO.

**240ml** BS4922 (Pink)

Wide-neck X-cut Imi-teat PRO

Gently squeezing on the soft silicone bottle body will start the milk flow.

Warning: Flexi-straw contains metal parts, not suitable for microwave sterilisation

**Silicone bottle**

Soft to touch, easy to hold

07

## Glass Feeding Bottle

Produced from the highest quality borosilicate glass, our glass bottles are the safest on the market.

Babasil glass feeding bottles are made from borosilicate glass, the safest material available on the market for feeding bottles. Borosilicate glass can withstand ultra-high and ultra-low temperature cycles. The bottles are completely seamless, easy to clean, safe and non-toxic (printing conforms to U.S. FDA safety standards).

### Borosilicate Glass Feeding Bottle Mum's favourite "safe" feeding bottle

Compact and portable

Great for small hands

+  
X-cut Flow

4+ months

Designed for juice and thicker liquids

Can also be used as a new-born bottle when combined with a new-born teat

10

## PP Feeding Bottle

Polypropylene (PP) is widely used as a safe material, commonly used for food containers and drinking bottles. It is also the only plastic that can be safely sterilised in a microwave oven as it does not release any toxic chemicals.

PP is stable up to 120°C, no BPA( bisphenol-A) release under high temperature. It can be reused after thorough cleaning.

**PP** Heat-resistant up to 120°C, the sole plastic that can be cooked in microwave

**PC** Heating, scratching and regular use will release Bisphenol-A

**vs**

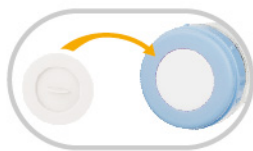

- 1 Light weight and durable
- 2 Easy to clean
- 3 Heat- resistant
- 4 BPA free

## Standard-neck PP Feeding Bottle

**6oz** SKU NO.  
BS4708 (Pink)  
BS4709 (Blue)

## Manual Breast Pump

SKU NO. BS4963

1 x 6oz Wide-neck PP Feeding Bottle Body  
1 x Wide-neck Slow Flow Imi-teat PRO

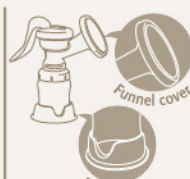

Convenient adjustable handle for maximum comfort

Multiple feeding bottles to choose

Comfort and efficient

Hygienic and robust

Pump directly into feeding bottle

Helps prevent sore and cracked nipples  
Provides effective relief from breastfeeding discomfort

## Nipple Protector

Suitable for breastfeeding mothers with inverted or sore nipples.

SKU NO. BD4073

Material: SR

100%  
Medical  
grade silicone

PP box included for easy and hygienic storage

## Ultra-thin for comfort

Shaped to allow maximum skin contact with baby while breastfeeding

- Leak-Proof Double Zipper Seal

- Safe Freezing!

## Breastmilk Storage Bags

SKU NO. BS4867

Material: LDPE

25  
sterilised  
Bags

A safe and convenient way to collect your precious breast-milk

- Pre-sterilised with gamma ray
- Double zipper seal prevents leakage
- Easy write-on surface for labeling
- Tamper evident safety seal
- BPA Free

## Soother Series

Ideal for soothing and relaxing babies at bedtime

0-4 months

**SKU NO.**  
BS4905 (Pink)  
BS4906 (Yellow)  
BS4907 (Blue)

Thin and soft underside for ultimate comfort

Breast-like design for baby to latch on naturally

Specially designed for new born babies, the pure soother mimics the natural flex movement and softness of breast-feeding, intaking air and automatically returning to its original shape.

6-12 months

**SKU NO.**

Curved Arms  
For Easy Gripping

## Drinking Cup with Straw

### SKU NO.

BS4779(Pink) BS4780(Blue)  
BS4950(Purple) BS4951(Yellow)

Material: PP, SR

**Leak-proof design for kids on the go!**

Hygienic cover keeps straw clean

1

High quality PP material

2

Flip-top cover is hygienic and effectively prevents spills and leaks

3

Unique straw design is spill proof at any angle or orientation

## Drinking Bottle with Straw

### SKU NO.

BS4769(Pink) BS4770(Blue)  
BS4771(Purple) BS4772(Orange)

Material: PP, SR

## Tips for Using Drinking Bottle&Cup with Straw

Incorrect assembly of the bottle/cup may result in leakage

### Disassemble

Pull out the white PP straw

1

Pull out the silicone straw

2

### Assemble

Note: The valve and PP Straw must be installed in place

3

Insert the white PP straw into the silicone straw

4

The Straw is designed to be spill-proof if your child encounters difficulties, check the following:

1

The straw opens and closes freely

2

Apply pressure while drinking to encourage the straw to open

Keeps drinks hot or cold for hours. Ideal for travel, outdoor activities and sports

## Vacuum Insulated Flask

SKU NO. BS4854

Material: Stainless Steel/ PP

- Vacuum insulated, for keeping hot liquids hot, and cold liquids cold
- Push and pour leak-proof stopper
- Cap can also be used as a cup
- Ideal for travel, outdoor activities and sports

Protective Carry Bag Included

## Vacuum Insulated Leak-proof Straw Bottle

Free Silicone Straw

SKU NO. BS4855

Material: Stainless Steel/ PP/SR

- Vacuum insulated, for keeping hot liquids hot, and cold liquids cold
- Flip-top cover prevents spills and reduces leakage
- Cool to touch with hot liquids
- Adjustable strap is easy for carrying

9+ months

**Tips:** Please do not pour hot water over 50°C to avoid scalding. Please preheat (precool) before use.

## Vacuum Insulated Leak-proof Straw Cup

9+ months

SKU NO. BS4856

Material: Stainless Steel/ PP/SR

- Vacuum insulated, for keeping hot liquids hot, and cold liquids cold
- Flip-top cover prevents spills and reduces leakage
- Cool to touch with hot liquids
- Ergonomic handle for improved comfort

Free Silicone Straw

**Tips:** Please do not pour hot water over 50°C to avoid scalding. Please preheat (precool) before use.

## Jelly Bib

SKU NO.

BS4299(Purple) BS4300(White)  
BS4577(Orange) BS4407(Green)  
BS4578(Blue)

Material: Silicone

Soft and flexible, with spill-proof trough

Handy, roll up design for travel and storage

Easy clean and dishwasher safe

Medical grade silicone

1 Spill proof trough catches any food that gets away

2 Secure, safe catch releases if snagged

3 Handy, roll up design for travel and storage

Dishwasher safe

## Little Angels Bowl and Cup

- High quality PP material
- Anti-slip handle for safer feeding
- Hygienic lid for easy storage

SKU NO. BS4086  
Material: PP, TPR

SKU NO. BS4087  
Material: PP, TPR

## Feeding Pot with spoon

SKU NO. BS4825  
Material: PP, TPR

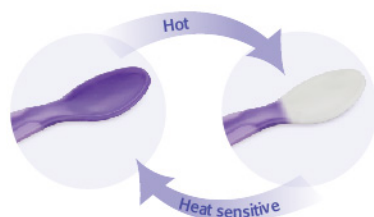

Changes colour to alert when food is too hot (over 43°C)

Non-toxic PP plastic

Hygienic spoon protection Non-slip handle Compartment design

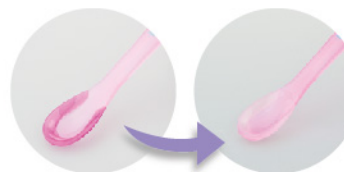

- Anti-slip base for less mess
- Hygienic spoon protection

## Peanut-shaped Baby Feeding Bowl (with Heat-sensitive Spoon)

SKU NO.  
BS4512 (Orange) BS4517 (Yellow)  
Material: PP

- Dual compartments with one side embossed to soften food;
- Compact and easy to hold;
- Anti-slip base for safer feeding;
- Heat-sensitive spoon included;
- Hygienic lid for easy storage.

**HOT!** Changes colour to indicate that food is too hot (over 43°C)

## Bendable Fork

SKU NO. BS4937  
Material: PP, TPR, Metal

Bendable up to 45°

## Bendable Spoon & Fork Set

SKU NO. BS5009  
Material: PP, TPR, Metal

PP Storage Case Included

- Oversized spoon head allows for easy self-feeding
- Specially designed fork head enables food to be picked up easily
- Bendable up to 45° according to baby's habits
- Aids faster transition to regular cutlery

## Bendable Spoon

**SKU NO.**  
BS4605 (Cyan) BS4606 (Orange)  
BS4607 (Blue) BS4369 (Purple)

Material: PP, TPR, Metal

6+  
months
